# User Guide for Tree view tool of PROGRES GRYPHAX<sup>®</sup> software

The "Tree view tool" of PROGRES GRYPHAX® software enables user to save, organize and handle media destination folder structure easily inside of GRAPHAX software without leaving software.

### General description:

The *Tree view tool* is located on the left software side next to the Gallery. It can be used with and without opened Gallery. Tree view deliver two different sizes: "**Narrow**" or "**Wide**" to display the media target tree.

To open, expand or close of the *Tree view tool* press the top left arrow on the left software side or use the keyboard short cut (**ctrl / cmd + D**).

<u>Note:</u> After first software start the *Tree view tool* is starting and displaying the default destination folder of operating system "own Pictures" from current user.

Alternatively, the Tree view is automatically displaying and using the last used destination folder from last software session or from activated user profile.

The media destination folder of Tree view is always synchronized with the software preferences under *storage options*.

The currently used destination folder for media storage is displayed with the save icon and colored in "blue" characters Quality sample 2017-04-03 All images and media files of selected destination folder are displayed at the software *Gallery*.
